

**THINK
DAIRY TECH.
THINK
PROMPT.**

prompt[®]
The pursuit of purity

WHO ARE WE?

Prompt is a pioneer in providing cutting-edge dairy tech solutions.

From farm management and milk collection to quality analysis and preservation, Prompt's innovative solutions ensure that milk's purity is retained at every step. Also, our cloud and IoT-based solutions have made milk procurement more transparent and traceable in real-time, thereby enhancing the dairies' efficiency and effectiveness and securing appropriate earnings for the farmers.

WHAT DRIVES US?

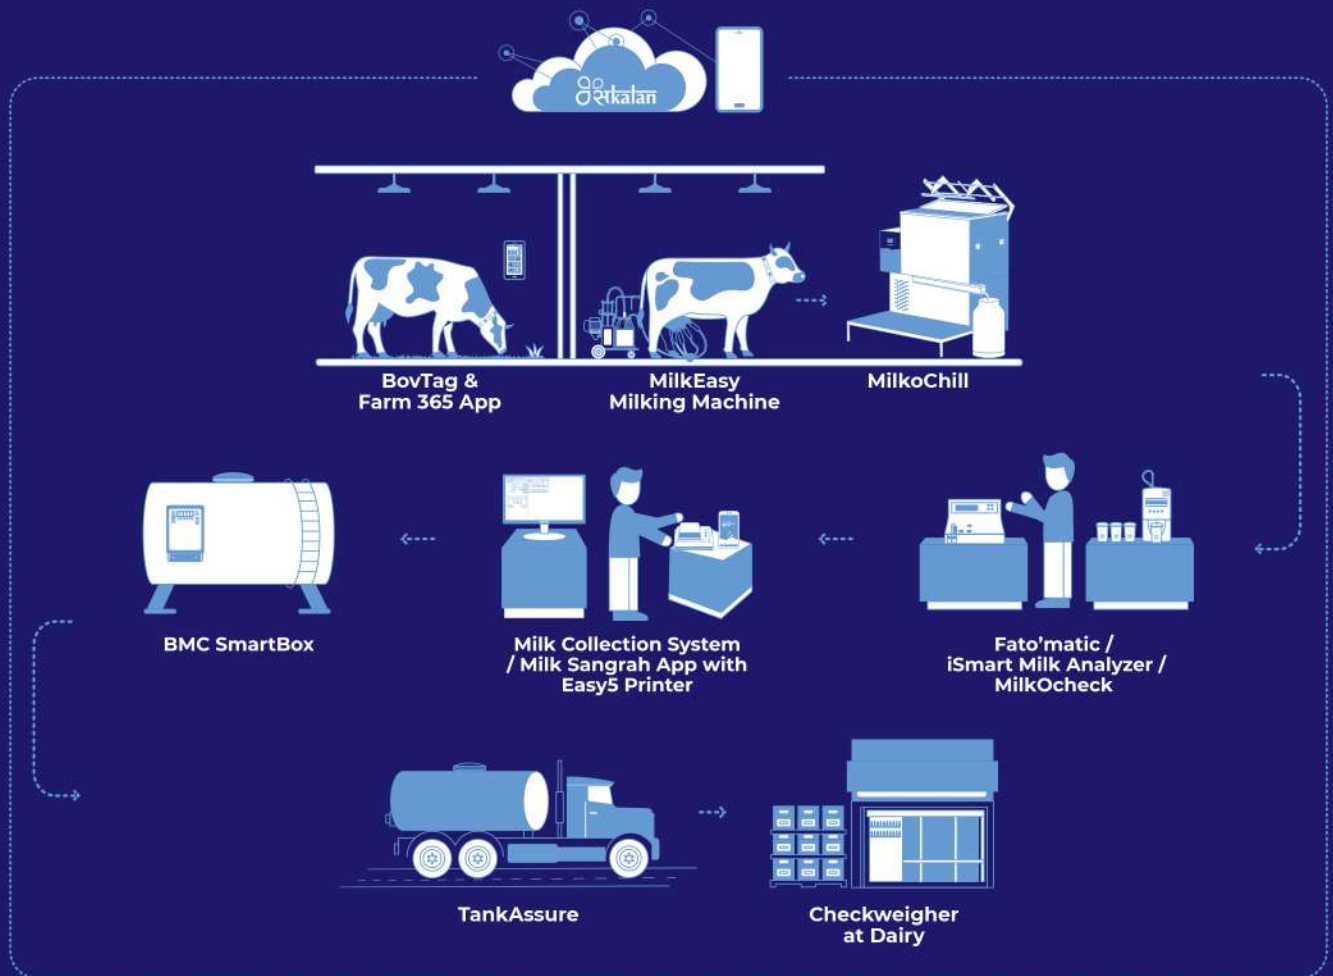

The passion for keeping milk at its natural best drives all our innovations. We call this relentless effort "**The Pursuit of Purity.**"

WHAT MAKES US UNIQUE?

We are an indigenous brand offering completely Made in India technological solutions and several patented products. The might of our

reach can be estimated from the fact that more than 50 lakh farmers pour milk through our systems and applications on a daily basis.

OUR INNOVATIVE SOLUTIONS ACROSS FARM LEVEL, COLLECTION CENTRE LEVEL AND DAIRY LEVEL

MilkOcheck

**FASTER, EFFICIENT AND INTUITIVE
COMPARED TO MILK CONTROL SAMPLES**

MilkOcheck is a patented solution to check the calibration status of any make of an Ultrasonic Milk Analyzer on-site. It enables dairies to check the calibration status of milk analyzers installed at various village locations from a central location. It removes the bottleneck of managing milk samples of various ranges of Fat/SNF and helps eliminate the practical problems of using raw milk samples for calibration.

Automatic Milk Collection System (AMCS)

**ENSURING TRANSPARENT AND FAIR
PAYMENTS TO FARMERS**

The automatic milk collection system digitalises the entire milk collection process. It gives real-time updates and stores data on cloud for easy access and ready insights. Computer-based, Data processor-based and Mobile-app based AMCS solutions enable transparency between dairy, milk collection centres and farmers.

TankAssure

**ENSURES TRANSPARENCY,
PROFITABILITY AND EFFECTIVENESS
OF THE MILK COLLECTION SYSTEM**

TankAssure is an intelligent and digitally password-protected system mounted behind the milk tanker with RFID-tagged tamper-proof sample vials. It automatically collects BMC milk samples, records milk quantity (through a magnetic flow meter) and registers milk temperature (through an in-built temperature sensor). All this data is then recorded on the web portal.

INNOVATIONS THAT ARE CHANGING THE DAIRY LANDSCAPE

MilkoChill

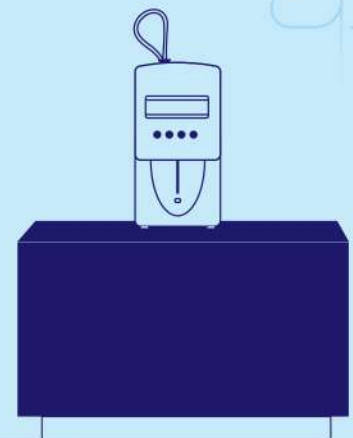

INSTANT MILK CHILLING FOR BETTER SHELF LIFE AND PROFITABILITY

MilkoChill is a patented milk chiller that chills milk at the source and brings the benefits of instant milk chilling right to the doorsteps of a farmer. It can chill up to 250 litres of milk in one hour. The energy consumption is very low while retaining milk quality at the source. The system reduces spoilage and can be powered by solar energy.

iSmart Milk Analyzer

INNOVATIVE AND INTELLIGENT MILK ANALYZER WITH CLOUD CALIBRATION

The iSmart Milk Analyzer is the first smart milk analyzer in the Indian market which offers secured cloud calibration assisted through Bluetooth enabled mobile app, thus making calibration free from manual intervention. The Ultrasonic Milk Analyzer measures and records milk fat, SNF, added water and milk density. It thus ensures transparency and optimum earnings to the dairy and the farmer.

WHY PROMPT?

Diverse range of
dairy tech solutions

A legacy of 3 decades

Unmatched
reach across India
