Why **prompt BOVEASY?**

bovine pregnancy rapid test kit

- Detect pregnancy in just 28 days after AI
- Non-invasive test method makes it safe for embryos and imported semen
- Reduces calving interval, saving up to Rs. 6,000/- per animal
- 98% accuracy rate as it detects pregnancy-associated glycoprotein
3 simple steps

01 Sample Collection

Collect 2-3 ml of blood from the tail vein, jugular vein, or ear vein of the animal or after the 28th day of artificial insemination.
02 Sample Preparation

Add 2-3 drops of blood into the sample well of the test strip.

03 Adding Diluent

Add 2 drops of diluent in the sample well.
Get results in just 20 minutes.
For accurate interpretation, make sure you read the results within 10 minutes.
Result interpretation

Quick Test: for multiple samples

°C Incubate at room temperature (18-28°C) for 20 min.

Note: Please interpret the result within 10 min. after the incubation.
PREGNANT	SUSPICIOUS	NON PREGNANT	INVALID
